PROJECTS

The weather App

Nov 2021 - Dec 2021

https://github.com/WhiteFang465/The_Weather_App

This application was developed to show the weather of all the cities in the world. It can take any language and show the output for that city. The application was created using Restful/REST API, NodeJS, and ReactJs.

AnimeWorld

Feb 2022-mar 2022

<https://github.com/WhiteFang465/Anime-World>

A Mobile application that gives you the list of all the animes. Search for your favourite anime and get the description about it. You can save and get information about your favorite animes. the technology for this project is Android, Room Database, and was developed using Android Studio.

MasterMind Game

May 2022 - Jun 2022

https://github.com/WhiteFang465/MasterMind_Game

A game that tests your memory and recollection skills. This game involves a computer that generates a random 4-digit number and the role of the player is to guess that code. You have unlimited tries and as a plus point, you get hints from the computer on how close you are to guessing the code. This hint will disappear on your next guess so you need to remember them and get it right.

OTHER EXPERIENCE

Reception Worker (Condensing Team)

Oct 2021 – present

Lufa Farms, Montreal

- Receiving and putting products away.
- Checking the inventory for issues.
- Condensing the inventory.
- Ensure the freezers are always clean.
